SITE DOCUMENTATION FORM
IMPORTANT!!! PLEASE READ CAREFULLY AND COMPLETE INFORMATION.

- A. If you answered yes to any of the above questions, these items are required to be drawn to scale on the site plans that you submit. The size and location of all buildings is required to be drawn to scale on the site plan. Please complete this information prior to submission of application of onsite sewage system construction permit. Failure to do so will slow your permitting process dramatically. Also, your permit will be issued based on the above information. Therefore, if any of this information changes subsequent to this, an amended sit plan will need to be submitted.
- B. The size and location of the onsite sewage system shown to scale on the site plan is the responsibility of the applicant. If a filled or a mound system is required shoulders and slope are to be shown to scale on the site plan. The staff of the onsite sewage program will make an initial attempt to show the size and the location of the onsite sewage system, however; any modification to the site plan due to space limitations will be the responsibility of the applicant or the applicant's agent.
- C. The applicant or the applicant's agent will need to sign and date the approved site plan.
- D. A re-inspection fee may be charged for multiple site visits. This may include but not limited to:
- Lot not cleared or flags not out
 - Inaccurate directions
 - Structure, private water well, waterlines, or plumbing connection not installed at time of construction inspection of septic system
 - Inaccessibility due to locked access, heavily wooded lots, marking of incorrect lot.
